

PICK OF THE BUNCH

JULY 2011

SMILE and the whole world smiles with you. We have all heard it before and it may make you want to go Arrh! But we know they are infectious (in a good way) and we all like to receive them. If you have one on your face it makes you more approachable. So smile and I'm sure you will get them back. (if not their face must be broken)

Remember to always be happy. Because you never know who's going to fall in love with your smile.
